

### PROJECT RECORDS

Flex Bon will provide the owner, and any other interested parties, with a complete record of products and colors used on all surfaces of a project, at the close of application.

The records will show all surface conditioners, primers, intermediate and topcoats applied to all coated substrates, as well as the color designations and color formulas for the products.

The record will also include the type and duration of a warranty issued for the project, the warranty expiration date, the Flex Bon store which sold the products, and the store's telephone number for customer convenience.

As the reports are customized for individual project requirements, other pertinent information may be added to the report at the request of the specifier, contractor or owner.

These reports become a permanent record at the Flex Bon factory in Fort Myers, and are copied to the stores which sold the products. There is no charge for this service.
